The Te Pari Tailing Chute is portable, easy to use and helps makes your lamb detailing or docking easy. The V-roller configuration helps to ensure safe, smooth and speedy throughput of lambs with less drag and less stress. Lambs from 2 weeks to 3 months old are handled easily with quick adjustment for different sized animals. Loading and unloading is simple with 4-5 lambs able to be worked on by multiple operators if desired.

The tipper unit allows the lambs to be tipped out of the chute and land on their legs rather than be pulled and dropped.

Ideal for drenching, ear marking, tailing, docking, castration and vaccinating. Manufactured with electroplated steel and heavy duty polyethylene rollers providing strong, durable construction and finish for long, trouble free use.

Tri-Solfen is a topical anaesthetic and antiseptic solution for pain relief for use on lambs following mulesing and tail docking, on lambs and calves during and following castration, and now for use on calves at disbudding and dehorning. Tri-Solfen can be easily applied on-farm as a post-procedure pain relief treatment to surgical wounds. It's the first product of its kind to address the legitimate animal welfare concerns associated with routine animal husbandry procedures.

With over 96 years of manufacturing heritage, Bainbridge is one of Australia's longest serving manufacturers and market leading suppliers to the veterinary and rural supplies field. The Bainbridge history is scattered across the nation: From featuring in the National Wool Museum to our high-quality equipment that has been handed down through generations of farmers. With a unique range of large animal veterinary equipment, our range has been utilised by veterinarians to improve animal health for generations.

While our roots are in animal husbandry and veterinary equipment, our product range today has diversified with a strong focus on animal breeding, hobby farming and farm supplies. As a manufacturer and wholesaler, Bainbridge offers a wide range of quality accessories which are available in every Australian rural community.

We pride our reputation on the quality of our products, our market leading customer service and our ability to efficiently supply our diverse range to our end retail customers through our resellers.

With a unique offering of two major distribution warehouses in the East and West of Australia and a hands on management team with industry specialised knowledge, Bainbridge is recognised as a leading partner to rural merchandise stores nationwide.

Being an Australian owned and operated company with a strong family background, Bainbridge understands the needs of our partner retailers and veterinarians as a reliable, dedicated and exclusive wholesale supplier – since 1922.

Vaccines

ERYVAC® FOR SHEEP

Eryvac® is registered for the control of Erysipelas polyarthrititis in lambs and sheep. Erysipelas infection may result in damage to the joints of sheep leading to arthritis.

Eryvac Vaccine 250ml Code No. 11762

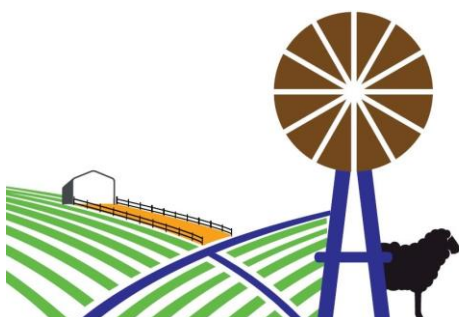

GLANVAC® 6 VACCINE

Glanvac® 6 provides sheep and goats with protection against Cheesy Gland (CLA) and the five main clostridial diseases; black disease, black leg, malignant oedema, pulpy kidney, and tetanus.

Glanvac 6 Vaccine 250ml Code No. 11763

zoetis

25 Moorundie Street,
TRURO SA.

www.truroagencies.com.au
Email: orders@truroagencies.com.au

GLANVAC® 3 B12

Glanvac 3 B12 Vaccine
250ml Code No. 11756

- Glanvac® 3 B12 provides sheep with protection against Cheesy Gland (CLA), tetanus and pulpy kidney with the added ability to correct cobalt deficiency in lambs and adult sheep.
- The type of adjuvant and the purification procedures used ensure maximum protection to stock against CLA, enterotoxaemia, and tetanus with minimal local site reaction.
- Vitamin B12 is required for energy production, cell division and replication as well as wool production.

GLANVAC® 6 B12

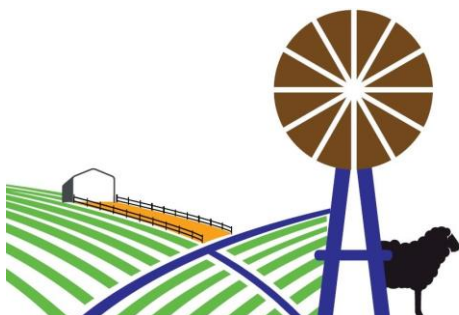

Glanvac 6 B12 Vaccine 250ml
Code No. 15441

- Glanvac® 6 B12 provides sheep with protection against cheesy gland and the five main clostridial diseases with the added ability to correct cobalt deficiencies in sheep and lambs.
- Sheep producers are benefiting from the features of this vaccine. The prevention of cheesy gland in sheep flocks improves fibre production and increases the quality of sheep meat. Cobalt is an essential trace element which is important for the production of vitamin B12 in the rumen. Cobalt deficiency can severely affect energy production which results in reduced fibre and meat production.

SCABIGARD®

- Scabigard® is the world's first tissue cultured scabby mouth vaccine for the control of scabby mouth disease in lambs and sheep.
- Scabigard® is a living vaccine which induces immunity by producing a mild, "controlled" form of the disease at a protected vaccination site.
- Scabigard® is grown in a laboratory using cells which are tested free from adventitious agents (including bacterial or viral contaminants).

AVENGE

AVENGE is new resistance-breaking chemistry from Bayer, the experts in sheep lice control. Its outstanding efficacy, fast action and prolonged protection set a completely new standard to break the resistance cycle. Avenge is the only knockdown, pour-on lice product with a four-week residual* period. This extra protection time means lice hatching from eggs after being treated with Avenge will be killed.

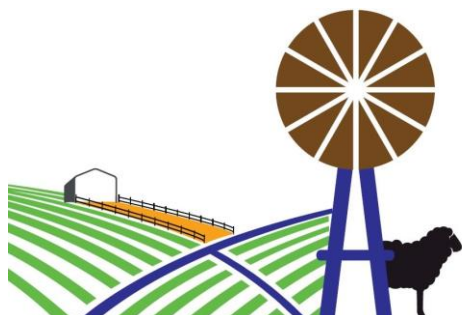

FLY STRIKE PROTECTION IN LONG WOOL

Applying Avenge in long wool (6 weeks to 8 months after shearing) provides protection against flystrike for up to 14 weeks, so you get all the convenience of one product for multiple jobs. Avenge is the only fly control product containing imidacloprid, a neonicotinoid insecticide. No resistance has been reported to imidacloprid.

OFF SHEARS LICE AND BLOW FLY PROTECTION

Avenge is the only knockdown pour-on product with a four-week residual period* against lice and up to 10 weeks protection against flystrike off shears.

Avenge 20L Code No. 14505

Lice Control

Extinosad Pour-On is registered for the control of spinosad-susceptible lice (*Bovicola ovis*) in sheep off-shears, suckling lambs and sheep with long wool. It has the following key benefits:

Extinosad 250ml Code No. 11803
Extinosad 5 Litre Code No. 14246

- Powerful knockdown chemistry that starts killing lice within hours of contact
 - Unique mode of action that kills lice like no other, ideal for rotation programs
 - No known field resistance, kills IGR and SP resistant strains of lice
 - Maximum marketing flexibility with a nil withholding period for wool and an ESI of only 21 days when applied off-shears or to unshorn lambs
 - Maximum management flexibility being able to be applied to sheep off-shears, with long wool or unshorn lambs
 - Water based, odourless formulation with a favourable safety profile that poses minimal risk to livestock, shearers, farm workers and the environment
- Effective lice control protects the productivity of Australian sheep and wool growers.
